**Glossary of Terms:**

**Chord:** A group of notes played together, such as the notes C-E-G (C Major)

**Open Chord:** A group of notes played on guitar that include “open strings”, meaning that strings are played with no fingers pressing on their frets.

**Common Tones:** When two chords share some of the same notes such as C (C-E-G) and Am7 (A-C-E-G).

**“Train Tracks”:** Holding your fingers in a chord shape while changing bass notes and keeping common tones on top.

**Voicing:** The exact order in which a chord’s notes are played. Playing E-G-C for a C chord is a different voicing than C-E-G.

**Fret:** the boxes on the neck of the guitar where you press your fingers to create different notes.

**Chord Scale:** All of the chord combinations that naturally occur in a major key. For instance, in C Major, the chord scale for worship music is C, Dm, Em, F, G, Am, G/B, back to C. These are numbered 1, 2minor, 3minor, 4, 5, 6minor, 5 over 7 and back to 1.

**Capo:** The device attached to the neck of a guitar to raise the notes. For every fret higher, the notes go up by a half step.

**Notes or Notes in a Scale:** Musical pitches belonging in a key. Numbers are used to refer to the notes in a scale such as C Major C-D-E-F-G-A-B-C is called 1 (also called “root”) 2-3-4-5-6-7-8 (same as 1).

**Damping:** purposely muffling a note by allowing your right or left hand to rest lightly on a string.

**Hammer On:** using the **left** hand to press down on a new fret to sound a note after a note has already been played via the right hand pick.

**Key or Tone Center:** The home notes and chords that belong together. For example, in the **key** or **tone center** called “C Major”, the notes that belong are C-D-E-F-G-A-B. The chords that belong are the chords of the chord scale, which are C, Dm, Em, F, G, Am, G/B (“G Over B”) and back to C.

**Walkdown:** The series of chords in a chord scale that descend naturally in a key. For instance C, G/B, Am, Am7/G, F, C/E, Dm7, up to the F/G and back to end on C.

The open chord concept is a way of playing chords that allow you to keep common tones (the high B and E strings) sounding while playing through a chord progression. The roman numerals on the chart below refer to the chords in the chord scale. For instance, in the key of E the “I” chord is E, the “ii” (2minor or 2m) is F#m, the “I/3” (one over three) is E2/G#, the “IV” chord is A, the “V” chord is B, the “vi” chord is C#m, the “bVII” (flat seven) is D and the “I5” (one five) chord is E5 meaning that there is no third in the chord, just E and B.

Paul plays the following chords of “Jesus, Lover of My Soul”

E  D#dim7  G#+7  C#m7  F#m7  A/B
Jesus, lover of my soul - Jesus, I could never let you go

D#dim7  G#+7

Exercise: Capo 1 and play the E Walkdowns (previous page).

Check out the action on your guitar. Are the strings too high off the neck? This can cause notes higher on the neck to go out of tune. Ask a professional guitar technician to lower the action as low as possible without creating a buzz on the strings.

Chapter 23 – Barre Chords

C Shape
The first Barre Chord “shape” is based on the C chord, so it’s called the C shape. A normal C chord looks like this:

To play it as a barre chord, we use our first finger to barre all the way across, then 2, 3 and 4 to create the C shape. If we do this on the 1st fret, we’ve created a Db chord. (It’s very similar to putting the Capo on the first fret and playing a C)

With the “C Shape” Barre Chord,

<table>
<thead>
<tr>
<th>To play</th>
<th>Barre on this fret</th>
</tr>
</thead>
<tbody>
<tr>
<td>Db/C#</td>
<td>1</td>
</tr>
<tr>
<td>D</td>
<td>2</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>E</td>
<td>4</td>
</tr>
<tr>
<td>F</td>
<td>5</td>
</tr>
<tr>
<td>F#/Gb</td>
<td>6</td>
</tr>
<tr>
<td>G</td>
<td>7</td>
</tr>
<tr>
<td>Ab/G#</td>
<td>8</td>
</tr>
<tr>
<td>A</td>
<td>9</td>
</tr>
<tr>
<td>Bb/A#</td>
<td>10</td>
</tr>
<tr>
<td>B</td>
<td>11</td>
</tr>
</tbody>
</table>

A Shape
The next Barre Chord “shape” is based on the A chord, so it’s called the A shape. A normal A chord looks like this:

To play it as a barre chord, we use our first finger to bar all the way across, then make another barre with our 3rd finger to create the A shape. If we do this on the 1st fret, we’ve created a Bb chord.
With the “A Shape” Barre Chord,

<table>
<thead>
<tr>
<th>To play</th>
<th>Barre on this fret</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bb/A#</td>
<td>1</td>
</tr>
<tr>
<td>B</td>
<td>2</td>

<tr>

<td>3</td>

<tr>
<td>Db/C#</td>

<tr>

<tr>

<td>6</td>
</tr>
<tr>
<td>E</td>
<td>7</td>

<tr>

<tr>
<td>F#/Gb</td>
<td>9</td>
</tr>
<tr>
<td>G</td>
<td>10</td>
</tr>
<tr>
<td>Ab/G#</td>
<td>11</td>
</tr>
</tbody>
</table>

**E Shape**

The final Barre Chord “shape” is based on the E chord, so it’s called the E shape. A normal E chord looks like this:

To play it as a barre chord, we use our first finger to barre all the way across, then use our 3rd, 4th and 2nd fingers to create the E shape. If we do this on the 1st fret, we’ve created an F chord.

With the “E Shape” Barre Chord,

<table>
<thead>
<tr>
<th>To play</th>
<th>Barre on this fret</th>
</tr>
</thead>
<tbody>
<tr>
<td>F</td>
<td>1</td>
</tr>
<tr>
<td>F#/Gb</td>

<tr>

<tr>
<td>Eb/D#</td>

</tr>
</tbody>
</table>

Exercise: Pick a major chord – for instance “F” and play it with the lowest voicing bar chord first, then work up the neck to the next 2 voicings.
